

## ALGORITHM D: Medical Treatment Only (No Evidence Collection)

Always comply with mandated reporting requirements. See [Provider Responsibilities](#) and [Appendix 6](#) for Virginia laws on mandatory reporting.

\*STIs recommended for testing and treatment: gonorrhea, chlamydia, trichomonas, syphilis, hepatitis, and HIV. Note that CDC recommends consulting with a pediatric HIV specialist prior to the initiation of HIV PEP in children under the age of 16. See [Appendix 7](#).

‡At the time of publication, FDA-approved emergency contraceptive pills are approved for use up to 72 hours after unprotected intercourse. Some clinical guidelines recommend use of emergency contraception up to 120 hours after unprotected intercourse (ACOG, 2005; WHO, 2007). Patients should be informed that the efficacy of emergency contraceptive pills diminishes with time since unprotected intercourse.
